PRAKHAR SHUKLA

Senior FullStack Engineer

Gurugram, India | +91 9987151295 | prakharshukla20160@gmail.com | https://www.linkedin.com/in/prakhar-shukla-frontend-dev/

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years building production React.js, Next.js and Vue.js applications, alongside hands-on Node.js backend development across fintech-edtech and B2B SaaS. Owns frontend architecture and end-to-end product delivery, including AI-powered onboarding, B2B dashboards, CRM platforms, reusable component libraries, backend APIs and asynchronous workflows. Delivered measurable improvements in onboarding conversion, KYC completion, referral growth, delivery efficiency and cost, with experience in performance optimisation, cross-platform analytics and attribution. Mentors engineers through architecture discussions, code reviews and production debugging.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Zustand, Pinia, Vuex, Tailwind CSS, Material UI, Quasar, Angular, jQuery, DataTable.js, Ruby on Rails views (ERB)

Backend & Data: Node.js, Express.js, NestJS, REST APIs, WebSockets, Joi, RabbitMQ, MongoDB aggregations, data migration scripts, AES-256-CBC encryption

Analytics & Integrations: Mixpanel, MoEngage, CleverTap, GrowthBook, GTM, Firebase, Meta Event Manager, LinkRunner MMP, SKAdNetwork, Engati, SurePass/CIBIL, Google Ads (UAC)

Build & Quality: Storybook 8, Vite, Webpack, code splitting, performance profiling, Core Web Vitals, Jest/React Testing Library familiarity

Platforms & Tools: Git, AWS (EC2, S3), Vercel, Netlify, Sentry, SigNoz, Grafana, Docker/Jenkins, Codex, Claude, GitHub Copilot

WORK EXPERIENCE

GradRight Inc. | Senior Full Stack Developer (SDE-II) Nov 2022 – Present

Fintech-edtech products serving students, lenders, insurers and university partners.

- Reduced onboarding dropout by **30–40%** by leading frontend delivery of **GradGuru's AI-powered onboarding**; built configurable React conversational journeys with Redux Toolkit for new/returning users across India/Abroad flows, integrating SurePass/CIBIL checks, KYC and analytics, this was part of FundRight Product serving **1M+ MAU**.
- Built **AdmitRight**, a Next.js B2B dashboard for **7+ universities**, with funnel analytics from program impressions to loan disbursement, applicant insights (GRE/GMAT/TOEFL/IELTS, CGPA), event tracking and campaign management; implemented API-controlled charts/filters and Zustand store slices for configuration changes without frontend redeployment.
- Led frontend architecture for an **in-house CRM replacing Salesforce** with feature parity, reducing CRM costs by **90%**; implemented configurable filters, reusable HOCs, role-based views and extensible lead/contact workflows.
- Built a **Storybook 8 component library** with Vue 3 and Quasar, adopted across teams to standardise UI and improve frontend delivery velocity by **60%**.
- Led the **Vue 2 to Vue 3 migration** across core surfaces with full feature parity and **zero downtime**, carrying shared component-library standards into migrated projects.
- Profiled and debugged production web applications, resolving Axios instance leaks, memory leaks and uncleared intervals; contributed to **Core Web Vitals and bundle-size improvements** through Vite build optimisation and code splitting.
- Improved KYC completion by **20–25%** by independently building an **Engati WhatsApp flow** for Aadhaar, PAN and passport uploads, with Node.js APIs for S3 storage/persistence; implemented a RabbitMQ delayed-exchange workflow to re-engage users one hour after incomplete onboarding.
- Built the **Referrals Project** from scratch with Next.js, Node.js and Redux Toolkit; delivered responsive desktop/mobile experiences with source-aware rendering across product lines, increasing referral-driven leads by **10–15%**.
- Built **InsureRight** end to end using React.js, Node.js and Tailwind CSS, with dynamic rendering across product lines.
- Built Node.js APIs with **Joi validation middleware**, MongoDB aggregation pipelines and data migration scripts; implemented asynchronous workflows using RabbitMQ.
- Owned **CleverTap integration for GradRight's SuperApp**: configured Android/iOS SDKs, FCM/APNs, deep links and rich push templates; handled TestFlight/Play internal releases and backend-configurable event routing to Mixpanel/CleverTap.
- Owned **Mixpanel's onboarding event taxonomy for 260+ events**, capturing user choices, funnel progression and dropout points; standardised web/Flutter instrumentation and attribution properties across Mixpanel/MoEngage, increasing event-tracking coverage by **40%**.
- Built **cross-platform attribution** with LinkRunner MMP, GTM, Firebase and Meta Event Manager across web/iOS/Android; implemented deferred deep links, SKAdNetwork conversion configuration and SHA-256 signing to track ad clicks, installs and signups while preserving Google Smart Bidding signals.

- Implemented **GrowthBook A/B testing** across FundRight/GradGuru flows, using Mixpanel analysis to guide onboarding variants and product decisions.
- Mentor **3–4 engineers** through code reviews, frontend architecture and system-design discussions, branch-management practices, production debugging and product onboarding.

ImpactDash Technologies | Full Stack Developer (SDE-1) Sep 2020 – Nov 2022

- Owned **ImpactOne's frontend and full React UI revamp** on the early engineering team for CSR clients including Ashok Leyland, Hinduja Group, IndusInd Bank and BPCL; delivered NGO onboarding, due diligence and project-monitoring workflows.
- Reduced combined **CSR recording and monthly reporting time by 70%** by centralising campaigns, costs, fund allocations and beneficiary records; replaced Excel/paperwork consolidation with filterable dashboards and downloadable monthly reports generated in minutes.
- Built React/Redux features and **Node.js/MongoDB APIs**; implemented authentication, role-based access, permissions and admin panels.
- Built configurable **Material UI theming** for client-specific white-labelled deployments, maintaining consistent design across the product portfolio.
- Delivered **Chart.js/Recharts dashboards and Leaflet maps** for monitoring project assets, activities, beneficiaries and financials; supported IRIS+ reporting and SDG benchmarking.
- Built **WeVolunteer's React frontend** for registration/onboarding, activity scheduling/tracking, hour logging/reporting, corporate CSR integration and volunteer-impact measurement; contributed **Angular frontend** work to Namami Gange.
- Worked directly with product managers and visited **BPCL** to gather requirements, tailor account workflows and support adoption; mentored **two junior engineers** while owning frontend delivery.
- Supported AWS deployments using **Docker and Jenkins**.

BulkMRO Pvt. Ltd. | Frontend Developer Jan 2020 – May 2020

- Built **Phoenix's catalogue and add-to-cart frontend** using jQuery, HTML and CSS for an upgraded B2B wholesale procurement and supply-chain platform.
- Consolidated approximately **10–15 data-table implementations** into one generic reusable component supporting different columns and cell-content types, reducing duplicated code.
- Updated the legacy **Ruby on Rails application's UI** using ERB templates, HTML and CSS.
- Built **reusable CSS components** to standardise styling across product pages.

EDUCATION

Lovely Professional University 2016 – 2020

B.Tech, Computer Science and Engineering | CGPA: 7.88 / 10
